

REMARKS

The Office Action of November 24, 2003 has been carefully considered. Reconsideration in view of the following remarks is respectfully requested.

Claims 1-3 were rejected under 35 USC 112, first paragraph as not being supported by an enabling disclosure. The same claims were also rejected under 35 USC 112, second paragraph as being indefinite.

Claims 1-3 have been canceled and new claims 5-7 have been added. The newly-added claims are believed to satisfy the requirements of Section 112.

The claims again recite a control circuit. Although the particular structure of the control circuit is not described in the specification, the particular function of the control circuit is described in detail. The control circuit may take any of various well-known forms including, for example, a microcontroller. Applicant submits that, based on the description found in the specification, one of ordinary skill in the art would readily be able to make and use the claimed invention without undue experimentation.

Favorable consideration is respectfully requested.

Respectfully submitted,

Michael J. Ure, Reg. 33,089

Dated: February 23, 2004
